

# What a recipient receives from "Message Pickup Center (MPC)"

**Note:** If a message should NOT REQUIRE encryption, it is routed directly to the recipient unchanged.

**Step 1** - The recipient gets an email (similar to below) from Message Pickup Center (MPC):

**Step 2** - The activation information (activation password and link) is provided in the message.

**Step 3a (First time)** - To activate the account the recipient will need to follow the activation link and enter the name and activation password. The recipient will also create a new password for the MPC.

**Step 3b (repeat user)** - If a recipient was using Message Pickup Center (MPC) before, he or she will get a message from MPC (see above) with the subject 'You have a new encrypted message from [sender's address]'. This email will have information about encrypted message, such as subject, sent and expiration date, along with the link to access the encrypted message.

The recipient should follow the link and enter his or her email address and password (created during activation) to login. After that the recipient will have access to the message.
